Freestanding concept

As you can see, these houses are built with the freestanding concept and does not cause damage to the environment where they are built. It is 100% eco-bio green, with certified materials,

They are fully customizable as you prefer. From layouts to materials, each module can be designed to work for you. Add the bonus to all of this it takes only 90 days from order time to your job site and only 3 hours to assemble.

 Delivery time
90 days

 Assembly
3 hours

 Eco, Bio
and Green

Volumetric solutions?

Have you thought of having a house in your yard in just 3 hours? This is possible with this volumetric solution. This type of construction is going to deliver you a project on budget, as scheduled, and in less time than the other construction types

These flying homes is easily transported anywhere in the world, as it is made of one unit built by joining two cubes where the assembly process lasts only 3 hours

Aster Domo Community

Our goal is to make change happen for a livable and sustainable world of the future. Living communities that are healthy lifestyles and resilient infrastructure that benefits all people.

From small to large projects our goal is to improve the quality of living by creating well-designed spaces that create a connection and interaction with nature and humans.

Different Façade

We can produce different customization options for homes that best fit the environment. Choose from three high-quality facade materials, white edition, black edition, and wood edition to design the exterior look of your own home.
